EXPLANATION

Find first the *Year of the Century* and in line with that figure at the right, in the proper column under the heading *Centuries*, will be found the Dominical Letter of the year. Then in the table headed *Dominical Letter* and in line with the proper *Month* find the letter previously determined. Run down this column until you are in line with the proper Day of the Month and at the intersection you will find the Day of the Week.

In Leap-Years the Dominical Letters for January and February will be found in the lines where these months are printed in *italics*.

EXAMPLES

On what day of the week did January 5, 1891, fall? For 1891 the Dominical Letter is "D." After finding this letter opposite January in the upper right hand table, and running down that column until you are opposite 5 (the day of the month), you will find Monday. For *January* 1, 1876, the Dominical Letter is "A." Under "A," and in line with 1 is Saturday.
